

Kuwait Oil Company Kuwait.

Customer Profile

The Kuwait Oil Company is one of the largest oil companies in the world with a huge refining capacity. Kuwait's economy is heavily dependent on this particular state-run organization and it is the backbone of Kuwait's economy. The company is involved in many activities relating to oil and natural gas exploration.

Business Situation

KOC realized the importance of having in- house Calibration facilities at their Ahmadi factory to meet the challenge of keeping their critical process control instruments, including control valves, intact with in the specified accuracies at all time to ultimately monitor & control the production of precious oil.

Task

Their big task was to identify the right supplier who can provide expert guidance, besides offering total solution ('concept to completion') by installing 'state of the art' 'work shop automation calibration system, comprising Test Benches / Work Stations / Rigs

Solution

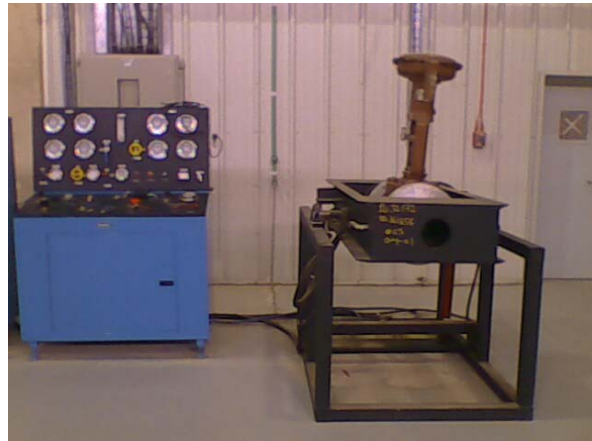

KOC rightly identified Nagman to provide solution & awarded the contract, as the brand name of Nagman has been registered in the community of Instrumentation Professionals across the globe.

The main reason for awarding this contract is that KOC understand Nagman as the specialist, who can custom design 'Level Test Rig 'as per their requirement / choice. LTR – perhaps the first of its kind facility to calibrate multiple types of Level Devices.

Solution Description

Work shop automation calibration system, (with custom designed 'Calman' software) comprising of

- Nagman's Heavy Duty Electronic Test Bench, System 5000
- Nagman's Multifunction Test Bench, System 9600
- Test Bench – Hydraulic Valve, Static Floor mounted
- Test Bench – Control Valve, Static Floor Mounted
- Nagman's Level Test Rig, Model : LTR

Customer Satisfaction

In getting 'state of the art 'Work Shop Automation Calibration System' that would ultimately work as a role-model to their other plants while creating invidiousness for their competitors in Oil & Gas sector.
